

Demographic Mapping

GIS 4 Schools has extensive experience in analyzing and mapping demographic data. Northwest Hennepin County Human Services Council contracted with GIS 4 Schools to identify and map the rapid influx of minority population in Hennepin County. Existing demographic sources under reported the number and geographic extent of this trend. GIS 4 Schools used enrollment data from elementary schools in the project area to successfully tabulate increases in minority enrollment. The map below shows the percent of minority enrollment for all cities in Northern Hennepin County. It clearly highlights the high concentration of minorities in Brooklyn Park and Brooklyn Center.

GIS 4 Schools is an expert in Demographic Mapping and Analysis Techniques and can deliver custom training courses tailored to your mapping needs. See how easy it is to turn data tables in to powerful maps. To learn more about easy-to-use tools available to access Census data contact:
